

HEALTH & SAFETY POLICY

We believe that our business activities can be undertaken safely and we undertake to ensure that safety requirements will not be compromised on our premises or on our customers' premises.

We operate our business in a way that ensures safe and healthy working conditions, well maintained equipment and safe systems of work for all our employees. We will provide such information, training and supervision as they need in any area of their work. We aim continuously to improve these arrangements.

All members of Turner Fluid Power Ltd. undertake to maintain a positive approach to safety rules and guidelines, to be knowledgeable about the properties of any hazardous substances they use and to use the appropriate protective equipment correctly.

They also undertake to comply with the Health & Safety Provisions required by our customers, when they work on their sites. Details of these requirements are maintained at our offices.

We are always aware of our duty to ensure the safety of customers, visitors and sub-contractors entering our premises and we ask them to work under our guidance.

This policy and the way it is operated will be reviewed every year.

Ian Turner
Managing Director
